

New Mast Systems From Total Mast Solutions The New Large Winch up Mast System

"The new super strong and versatile mast system"

Key Features-

- 1&2- Stainless steel head-load adapter with 2 clamp knobs. Internal sizes- 54mmx54mmx150mm deep. Many alternative types are available or we can make them to suit your requirements.
- 3&4- Standard head-load receiver plate with 4 fixing bolt holes and 4 guying eyes.
- 5- Robust nylon tube guiding segments, 4 per collar.
- 6- Winching runner wheel.
- 7- Mast retaining safety pin for use when fully extended. This can be padlocked for additional security.
- 8- Safety pin hole.
- 9- Wall fixing spacer brackets. These are useful for avoiding over hanging structural items such as gutters. These can be made to suit your requirements. Sold as an additional item these have 4 10mm fixing holes.
- 10- Middle pivot assembly sold separately for use with a pivoting frame that will allow you to pivot the mast to horizontal for installing head-load equipment
- 11- 3 fixing plates with 4 10mm holes
- 12- 2 water drain holes
- 13- Base fixing plate with strengtheners, 6 slotted 13mm fixing holes and 2 30mm fixing holes
- 14- Strong 5mm stainless steel winch wire
- 15- Robust winch with 2 way ratchet function

The mast can be mounted to a building, a structure, our pivoting frame pod, a trailer or simply bolted to concrete from the mast base. This makes it extra versatile and super strong.

All sections extend simultaneous, this function allows the mast to be extremely strong when partially extended due to the sections overlapping.

The new large winch up mast system
